

Celebrating 25 Years of PESIT

The PES Vision

To create professionally superior
and ethically strong global workforce

When I look at PES, I am reminded of Infosys.

N R Narayanamurthy
Founder, Infosys Technologies

In 1972, PES was founded in Bangalore with just over 40 students. Today, we have more than 18,000 students spread across four different campuses in Karnataka and Andhra Pradesh.

It is our unwavering commitment to the highest quality education that has sped us along on this journey. I would also like to thank the generations of parents who have entrusted us with the care and education of their children. It is their faith and belief in the PES values – Perseverance, Excellence and Service – that has helped us come this far.

I believe that education has the most critical role to play in the progress of a nation. We realize that our students represent the future of our society and we take our responsibility seriously. We ensure that the rock-solid foundation we help them build here – both, in terms of skills and values – will stand them in good stead no matter which career they choose. Along with the requisite academic and related skills, we try and instill empathy for the less fortunate in our students and a concern for the environment around them.

We create opportunities not just for young people to learn, but also for them to experience the fulfillment that comes from sharing this learning with others. At PES, we will always be focused on delivering education that will help create the leaders of tomorrow's world – men and women who will not just be successful in their individual capacities, but who will in turn, contribute to and nurture the world they live in.

Thinking ahead has a lasting impact. At PES, this approach has helped us create history. For over 25 years, we have helped more than 20,000 aspiring professionals discover their true potential by guiding them through every stage of their learning and development. This has ensured our students' readiness to face real challenges and create a positive impact, in their organisations and in society.

The university status is another step in fulfilling our vision of creating a world-class educational institute that will enable our students to serve with distinction not just as professionals, but also as citizens of our country. As we look ahead, we are confident of being counted among the top 10 universities in India by year 2020. Nurturing young minds does have its benefit - history is rewritten every step of the way.
